DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-5, 7-12, 14-20, 22-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Berner (4190972).

Berner discloses:

a drive housing disposed on the body;

a cavity disposed in the body, the cavity having a first side, a second side, and An apparatus for moving particulate matter, comprising:

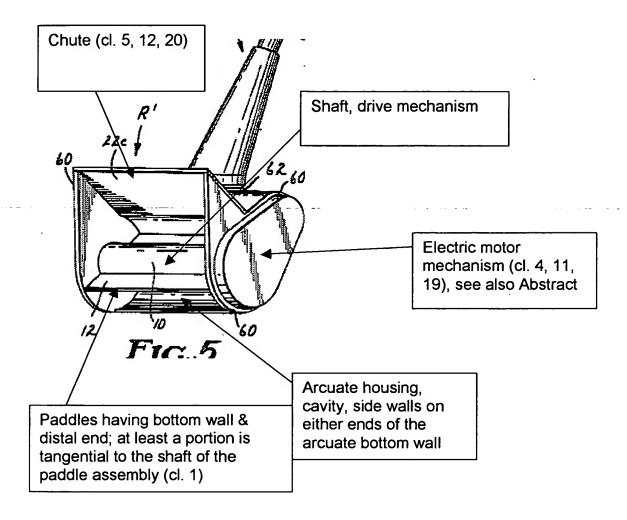

at least a partial semi-circular cross-sectional shape;

a paddle assembly having a shaft and a plurality of paddles disposed therefrom, each paddle having a bottom wall and a distal end, wherein the distal end travels along the semi-circular cross-sectional shape of the cavity during operation, and the bottom wall is sized and shaped to extend along a width of the paddle in a substantially planar manner between the first side wall and the second side wall of the cavity; and

a drive mechanism disposed in the drive housing, the drive mechanism operatively connecting the motor and the shaft.

Application/Control Number: 10/772,811

Art Unit: 3671

in col. 3, In 52, it is taught that the body is constructed from a plastic material (in re cl. 7, 14, 22);

in re cl. 8, 15, 23, the "particulate matter" is recited in the intended format, therefore the grain use is met by Berner, since it is capable to be used for any particulate matter, including grain.

Application/Control Number: 10/772,811 Page 4

Art Unit: 3671

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 6, 13, 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Berner (4190972).

Berner discloses the claimed invention of having a low RPM rotation except for .teaching the specific range of 350-525.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have an RPM range of 350-525, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. *In re Boesch*, 617 F.2d 272, 205 USPQ 215 (CCPA 1980).

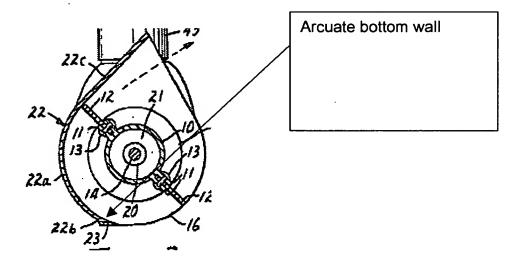

Art Unit: 3671

Response to Arguments

5. Applicant's arguments filed 12/02/2004 have been fully considered but they are not persuasive.

In re claim 1: "no portion of the paddles in Berner is tangential to the shaft of the paddle asemblye" as now amended, is not agreed with, Applicant's attention is directed to Applicant's figures, where the shaft is shown to be parallel, similarly to Berner's device. If Applicant's shaft is tangential, then Berner's is also tangential, since they disclose identical relationship to the bottom wall.

In re claim 9: "Berner does not disclose an arcuate wall" is not agreed with:

In re claim 16: "a filter, thereby preventing particulates from contaminating the motor or the drive" is not met by Berner, is not agreed with. Berner's motor, drive, just like any other similar device requires air to cool the motor, there is an inherent filter to prevent the motor/drive to be contaminated.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3671

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Árpád Fábián Kovács whose telephone number is 703-308-5897. The examiner can normally be reached on Mo-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas B. Will can be reached on 703 308 3870. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
